FOOD INTOLERANCES ARE A MYTH
 The inflammatory relationship between food and health is finally explained in a scientific way

Attilio Speciani

The immunologist and bestselling author Attilio Speciani dispels the clichés about so-called ‘food intolerances’ and guides the reader to a healthy and better relationship with food. There is a close relationship between food and health, and when the natural and physiological relationship with food changes, due to food excesses or the repeated introduction of food, the organism generates measurable inflammatory signals that induce and maintain many conditions or diseases.

CLINICAL INTERPRETATION OF ACID-BASE AND ELECTROLYTE DISORDERS. CASE STUDIES

Ivo Casagrande, Mario Tarantino

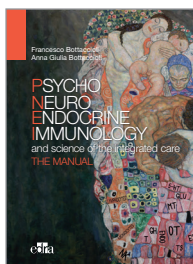

In clinical medicine and in emergency medicine especially, is crucial to understand and manage the acid-base and electrolyte disorders. This text, the result of years of clinical and educational activity, is organized in three parts: acid-base balance, water and sodium and electrolytes. Clinical interpretation and therapy are discussed through clinical cases that are the main educational tools.

PSYCO NEURO ENDOCRINE IMMUNOLOGY and the science of integrated care. THE MANUAL

Francesco Bottaccioli, Anna Giulia Bottaccioli

In this book PNEI paradigm presents itself in its full extension: from the description of the historical and philosophical bases of the paradigm; to the biological revolution underway, from the description of nervous, neuroendocrine, immune, psychic systems and their reciprocal influences; to the modulation tools of the human network for preventive and therapeutic uses, up to the final part that presents integrated care schemes, proposed on the basis of the available scientific evidence, for acute cardiovascular diseases, disturbances of the psyche-brain system, immune disorders, eating and metabolism disorders, reproductive and sexual dysfunctions and cancer.

MOUNTAIN EMERGENCY MEDICINE

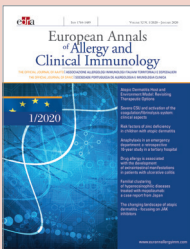

**Luigi Festi, Hermann Brugger
 Ken Zafren, Peter Paal, Giacomo Strapazon**

Mountain Emergency Medicine has seen exponential development due to the ever increasing number of people who hike or trek as well as practice extreme sports. Emergency physicians and nurses need to be equipped with the necessary training to be able to manage “on the field” accidents and sicknesses as well as their own physical security. This book is the first to offer a complete and thorough approach to this field of Emergency Medicine based on the latest research findings.

EASY COLPOSCOPY
Full Immersion

Giovanni Miniello

This practical atlas presents colposcopy in detail. It offers an innovative but extremely explanatory approach, to the benefit of space given to numerous didactic diagrams made with computer graphics and about 500 colpophotographs whose quality has received enthusiastic acclaim from the most authoritative international experts of Colposcopy. The author includes extremely clear images of squamous metaplasia's maturation phases, dysplastic lesions, carcinoma of the cervix and rare colposcopic cases.

**GOOD PRACTICE AND MALPRACTICE
 IN LABOR AND DELIVERY**

**Gian Carlo Di Renzo, Vincenzo Berghella,
 Antonio Malvasi**

Professional responsibility, “good practice and malpractice” in obstetrics is one of the major areas of medical-legal litigation. To date, however, there are no texts that deal simultaneously with both the critical aspects of labor and delivery and legal aspects. This text, for the first time, brings together both topics. It is the only one that responds to the need to provide a guide that indicates what to do and what not to do in the assistance of labor and delivery.

**PHARMACEUTICAL RESILIENCE
 How to Govern the Evolution of Treatments**

Luca Pani

Pharmaceutical Resilience offers us a compass to orient ourselves in this growing complexity, indicating the cardinal points and helping us find a path to follow in this historic moment, which is the result of the convergence of at least three macro-phenomena that are becoming evident at a global level: the increase in demand and the growing pressure to which public health budgets are subject; the evolution of the consumer patient; and the impact of technology.

THE GAVeCeLT MANUAL OF PICC AND MIDLINE
Indications, insertion and management

Mauro Pittiruti, Giancarlo Scoppettuolo

The use of intravenous access devices is fundamental for all patients needing frequent blood sample collection, artificial nutrition, chemotherapy, antibiotic therapy, and any other intravenous treatment. The big news in the last ten years has been the introduction of PICC (Peripherally Inserted Central Catheters) and MIDLINE catheters. This manual offers a thorough description of the several clinical settings in which these devices are used and provides clear information on the insertion procedures and management.
