MANUAL OF ANAESTHETIC MONITORING IN SMALL ANIMALS

Ignacio Sáñez, Miguel Ángel Cabezas, Miguel Ángel Martínez et al.

This book explains how to monitor the organ systems of healthy and medically compromised patients during anaesthesia so as to help veterinary surgeons understand what is happening at every moment. In addition, it has been conceived as a reference book that can be consulted in emergency situations. The authors provide in-depth information about the physiological aspects of anaesthesia, together with numerous clinical cases.

CHRONIC PAIN IN DOGS

Belén Ruano Puente

This book aims to introduce veterinary surgeons to a new concept of pain for a better understanding of what pain is and how it occurs. By describing pain pathways and their regulation, as well as the sophisticated therapeutic systems that are currently being developed, this book shows its readers how to interpret pain, and how identify it as a pathology in itself and treat it as such.

CARDIOVASCULAR-RENAL AXIS DISORDERS IN CATS AND DOGS

Javier Duque, Rafael Barrera

This guide addresses the two-way interaction between the heart and kidney (cardiovascular-renal axis) and shows how both acute and chronic disorders of either of these organs can affect the function of the other. To achieve its objective, the book describes the pathophysiology, diagnostic approaches, and clinical management of these disorders

CANINE AND FELINE DERMATOLOGY ATLAS

Gustavo Machicote

Having images of the pathologies when carrying out a diagnosis is undoubtedly highly appreciated by vet. Thanks to this atlas, vets will be able to look at images of common skin pathologies and thus be acknowledged for their "clinical eye", but they will also be able to view non-typical images that will guide those uncommon cases. Furthermore, typical images that are exclusive of certain localisations of the body, have been included.

50 Q&A ABOUT PARASITIC INFECTIONS OF HORSES

Aránzazu Meana Mañés, Francisco A. Rojo Vázquez

Through 50 questions and their corresponding answers, this book offers an entirely practical review of the endoparasites and ectoparasites which affect the equine species as well as the methods of controlling them. This book, organised into chapters divided by organ, presents real-life situations that deal with parasites of the horse in professional veterinary practice.

LOW-STRESS HANDLING IN THE VETERINARY CLINIC

Rosana Álvarez, Germán Quintana

This book is intended as a practical guide to improve various aspects of the everyday practice: how the veterinary surgeons understand and relate to patients and clients, the handling of animals during different procedures, and the implementation of programmes to deal with behavioural issues. These aspects will have a highly positive impact on the wellbeing of the patient, the client, and the staff.

BEHAVIOURAL CHANGES ASSOCIATED WITH PAIN IN COMPANION ANIMALS

Tomàs Camps Morey, Marta Amat Grau

This book deals with pain in companion animals and how it affects their welfare, health and, of course, behaviour. It describes the difficulties encountered to finally reach the conclusion that animals and humans share the same neurophysiological mechanisms to feel pain. It then goes deeper into the changes that pain can cause in the behaviour of dogs and cats and the tools available to the veterinary surgeon to control it.

STRESS, COMPASSION FATIGUE AND BURNOUT HANDLING IN VETERINARY PRACTICE

Inmaculada Pérez, Patricia Smith

There is a need to publicize the syndromes occurring in veterinary personnel due to work-related stress. Vets are apathetic or leaving the profession. It is vital for their emotional health that they know about these syndromes and the importance of seeking help early on. The up-to-date compilation of studies gives a clinical and human vision of these challenges based on the authors' experience.

EPIDEMIOLOGY IN SMALL ANIMAL PARASITOLOGY

Climate Change and Social, Economic and Political Factors

Peter Holdsworth, Maggie Fisher

This book provides an understanding of climate change and other contributing factors in the emergence/reemergence of parasitic diseases in companion animals. It describes the known changes in the epidemiology of key parasite infections and highlights zoonotic threats, and is therefore a valuable resource for veterinary practitioners to manage risks and keep abreast of emerging/reemerging parasitic diseases of pets.

Pet Owner Educational Atlas

José Antonio Orden, Alicia Gibello et al.

This atlas addresses the immune mechanisms of dogs and cats and describes the most important infectious and parasitic diseases. It has been designed as an aid to veterinary surgeons to help owners understand the processes underlying the development of some of the most important diseases of their pets, the immune mechanisms involved, and the importance of disease prevention through immunisation. The digital version includes 3D animations.

DIAGNOSIS IN DERMATOLOGY

Pet Owner Educational Atlas

Editorial Servet. Reviewer: Carmen Lorente

This second volume of the pet owner educational atlas about dermatology continues with the goal established on the first work: helping veterinarians in their communication with pet owners. This new work goes deeper into the specialty of dermatology and will therefore allow veterinary surgeons to consolidate and update their knowledge.

DERMATOLOGY

Pet Owner Educational Atlas

Servet editorial. Reviewer: Carmen Lorente

This illustrated work aims at helping veterinary surgeons to communicate with pet owners. After the previous volume about parasites, this atlas dedicated to dermatology helps the vet to explain the physiological and pathological characteristics of skin as well as the characteristics of diagnostic tests, treatments and surgical techniques.

PARASITES

Pet Owner Educational Atlas

Servet editorial. Reviewers: Doug Carithers, Guadalupe Miró

This illustrated work aims at assisting veterinary surgeons in their communication with pet owners. In this atlas, the drawings about internal and external parasites of dogs and cats will help veterinary surgeons when giving explanations about parasites to their clients, as well as about the control, prevention and treatment plans that may need to be set up.

SURGERY

Pet Owner Educational Atlas

Servet editorial. Reviewer: José Rodríguez

This notebook includes drawings of the anatomical structures, most frequent ailments and some of the most commonly used surgical techniques in dogs and cats. Its purpose is to facilitate communication between vets and their clients, since it will enable them to explain graphically what is happening to the pet, where, and the procedure for the possible resolution of the problem.

DOGS

Pet Owner Educational Atlas

Servet editorial. Reviewer: Alberto Barneto

The growing concern of dog owners for their pet's health results in a greater demand for information and explanations from their vet. This atlas aims at assisting vets in this communication task, since it shows a series of high-quality illustrations, which clinicians will be able to use in order to transmit their messages in the most effective way possible.

CATS

Pet Owner Educational Atlas

Servet editorial. Reviewer: Marisa Palmero Colado

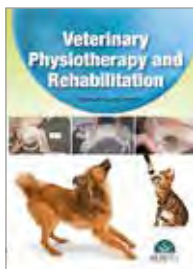

Each of the charts that make up this book has been thought to help veterinary surgeons transmit information in different fields and specialties of feline medicine to their clients, and includes small explanatory texts and tables that summarise the main concepts of interest. The clarity and precision of the drawings, and the easy handling of the atlas turn it into another clinical tool.

COLOSTRUM FEEDING IN PIGLETS

Essential Guides on Swine Health and Production

Luis Sanjoaquin, Walter Hurley

Because the prolificacy of sows can now be very high, piglets require special attention to ensure their survival. This book describes the importance of colostrum and its immediate ingestion after farrowing. The energy, immunity, and growth factors contained within make colostrum feeding essential for the optimal development of newborn piglets.

BIOSECURITY AND PATHOGEN CONTROL FOR PIG FARMS

Updated Edition: Special Emphasis on African Swine Fever

John Carr

This updated edition is released to help in the struggle against the African swine fever outbreaks which have significant impact on the global pig industry. There are very few books on biosecurity and this one details the subject explaining why, but more seriously providing practical advice on how to complete a review of the biosecurity measures required on a modern pig farm.

SWINE DISORDERS GUIDE

John Carr

This guide is a collection of key data and practical recommendations that turns it into a reference handbook for pig farmers, technicians and workers on swine operations. A number of tables and diagrams summarise the standard parameters relating to production, pig flows and the main clinical signs of swine diseases. The control lists included may be used as a starting point for the identification of disease outbreaks in breeding farms.

**HOW TO HANDLE AN AFRICAN
 SWINE FEVER CRISIS**
Vet Topics
Pablo Catalá Gregori, José Ignacio Barragán Cos

This book describes the key features of ASF including the characteristics of its causative agent (ASF virus), its various routes of transmission, and the broad spectrum of clinical presentations. This book discusses currently available tools for field detection and laboratory diagnosis of ASF, the importance of early detection, and recommended preventive and control measures.

THE OESTROUS CYCLE OF THE COW

Updated Edition

Manuel Fernández

This book helps the reader to interpret the reproductive status of the cow using an outstanding selection of photographs with an eminently practical focus. The carefully chosen images let the reader visualise what they are touching during an examination, and describe the more basic procedures, such as rectal palpation or artificial insemination. It also highlights the importance of using oestrus synchronisation protocols in routine reproductive practice.

VET TOPICS. NEONATAL DIARRHOEA IN CALVES

Pablo Díaz, José Pedreira, Patrocinio Morondo et al.

Neonatal calf diarrhoea is one of the most frequent problems on cattle farms, and can have a disastrous impact on farm profitability. The multifactorial nature of diarrhoea complicates its diagnosis and the selection of the control measures. This book uses a simple and practical approach to address the key aspects of the disease, providing professionals with a range of tools to facilitate its management.

THE PERIPARTUM COW: PRACTICAL NOTES

Manuel Fernández, Manuel Liz, Matilde Hernández

The cow's peripartum period from a practical point of view, explained through theoretical explanations and a huge collection of clinical cases. Normally, disorders or conditions occurring in the peripartum period are not independent events; they are the result of the interaction of several events occurring over time. The authors highlight here the importance of assessing bovine pathologies as a whole.

VACCINATION FAILURES
Main Challenges in Poultry Farming

Mohamed Faizal Abdul-Careem

A vaccination failure occurs when the chickens do not develop suitable antibody titer levels and/or are susceptible to a field disease outbreak. Therefore, an updated review has been thoroughly developed in order to highlight the importance of detecting and solving the major vaccination failures in commercial chickens.

ATLAS OF AVIAN NECROPSY:

MACROSCOPIC DIAGNOSIS SAMPLING

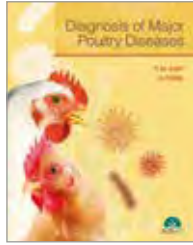

Updated Edition

Natàlia Matjó, Roser Dolz

This atlas describes the avian necropsy technique in a detailed and systematic manner. It also provides information about the pathologies commonly observed in poultry at the slaughterhouse, as well as guidelines on how to collect samples for diagnostic tests. This updated edition includes. In addition to more than 200 images, explanatory videos to obtain the maximum diagnostic yield.

VACCINATION IN POULTRY

Francisco Javier Torrubia, Sonia Téllez, Cristina Gómez et al.

Vaccination is one of the cornerstones of poultry production. In fact, it is one of the aspects that most influence production parameters in the poultry industry. In broilers, the optimum time of vaccination should aim at obtaining the maximum meat yield. In layers and breeders, both time and the route of administration have an influence in the quality of egg shells and the number of eggs per laying, among others.

HEALTH MANAGEMENT IN TILAPIA PRODUCTION

Carlos Arturo Iregui Castro, Alba Lucía Rey Castaño,
Ignacio de Blas Giral et al.

This useful guide serves to better diagnose and prevent the most common diseases affecting these fish. It covers infectious and parasitic diseases as well as the conditions caused by poor water quality. A chapter on biosecurity provides essential guidelines for both the prevention of diseases and their early detection. The high-quality pictures will help the reader gain basic knowledge of health management in tilapia.
